

Copper Paste

Product properties

High-performance lubricant with excellent releasing agent properties due its special formula consisting of molecular copper particles and highresistant fully-synthetic binding components.

Temperature range: -30 °C to +1200 °C

Area of application

The product is perfectly suitable for use at highest temperatures, for bolted joint connections and joint faces which are exposed to high temperatures, pressure and corrosive influences, e. g. bolts for compressors, turbines, exhaust pipes or sparking plug threads.

Application

Thoroughly clean the areas to be treated before application. Then apply the Copper Paste evenly onto the parts to be treated.

Consumption

For 5-10 applications

Reaction time

Works permanently

Technical data

Physical state: Paste

Colour: copper

Odour: odourless

Flashpoint: > 150 °C

Density at 68 °F: 1,05 g/cm³

Available sizes	Item no.	PU
100g	22105	24
